V.GROUP SAFETY “NON-NEGOTIABLES”

Safety non-negotiables

If you see it, you own it

See it, own it, improve it, and keep yourself – and your colleagues – safe

Status quo is regress

Challenge everything that does not look or feel right

Report in a timely manner

Make sure the necessary report is raised in a timely, detailed, and effective manner

Follow through

Close the loop and deliver!

We Win Together!

Collaborate and communicate with your shipmates, colleagues, and peers

WHAT IS THE V.VP?

The V.Group Verification Program (V.VP) is a means for us to set objectives that seek to continually improve our safety, operational, cultural, and business performances in a manner that aligns with and reflects the expectations of our customers, industry bodies, and legislative organisations.

The V.VP will be issued annually, and reviewed as each year progresses, to provide all V.Group colleagues – onboard and onshore – with a single reference document and set of goals that assure our constant, flawless service delivery.

How can we use the V.VP?

The V.VP can be used to further evidence V.Group compliance with many areas of our key industry expectations, such as our own safety management system (the V.MS) and external standards such as the ISM Code, TMSA, DryBMS, and MLC.

Each V.VP metric contains direct reference to relevant parts or regulations within these standards and shows our direct links between documented processes and our associated, measured performance.

The V.VP is not exhaustive and does not address every single area of these standards but can be used to evidence our compliance with certain key elements that directly improve our operational and business performances.

Does the V.VP replace our V.MS or other internal standards?

Absolutely not. The V.VP is a tool to help us prioritise, capture, and measure key performance areas that sit under our V.MS and other industry expectations. The V.MS remains our key internal reference document for setting operational standards and should always be utilised alongside the relevant external industry standards and guidance, whenever required.

What the V.VP does do, however, is provide us an opportunity to measure our performance against all these key documents and identify areas – in practical performance, or in our processes – where improvement or reinforcement may be required.

How does the V.VP align with The V.Way and our Ship Management Playbook?

The V.VP contains metrics that seek to place definable measurements around the cultural expectations of The V.Way and our Playbook, and each metric has direct references to content and expectations of those cultural standards. Simply put, The V.Way and Playbook tell us how we “Do” business – the V.VP shows how we Plan and Measure what we are Doing.

What about our other KPI's and existing performance measurements?

Firstly, we have used the V.VP to combine our annual HSSEQ KPI's and the V.VP operational metrics into one document, so we have a single reference point for these areas and will look to continue this in future, with each annual version of the V.VP being issued and available to all colleagues in time for each new business year.

Secondly, as the V.VP evolves over time, we will look to migrate more operational KPI's, programs and campaigns under this single ‘umbrella’, and similarly reduce and consolidate associated dashboards and metrics, so that we get to a single reference for all future discussions and measurements around operational business performance.

Can I use the V.VP during a vessel inspection or office audit?

Absolutely! If a client, vetting inspector, or Flag state representative is looking for evidence of our HSSEQ goals, or measures of key operational elements of our business, please do show them the V.VP and associated records.

Similarly, audit and inspection findings will be used to enhance future versions of the V.VP and its metrics, to ensure we are continually improving considering improvement opportunities that are identified and shared within V.Group.

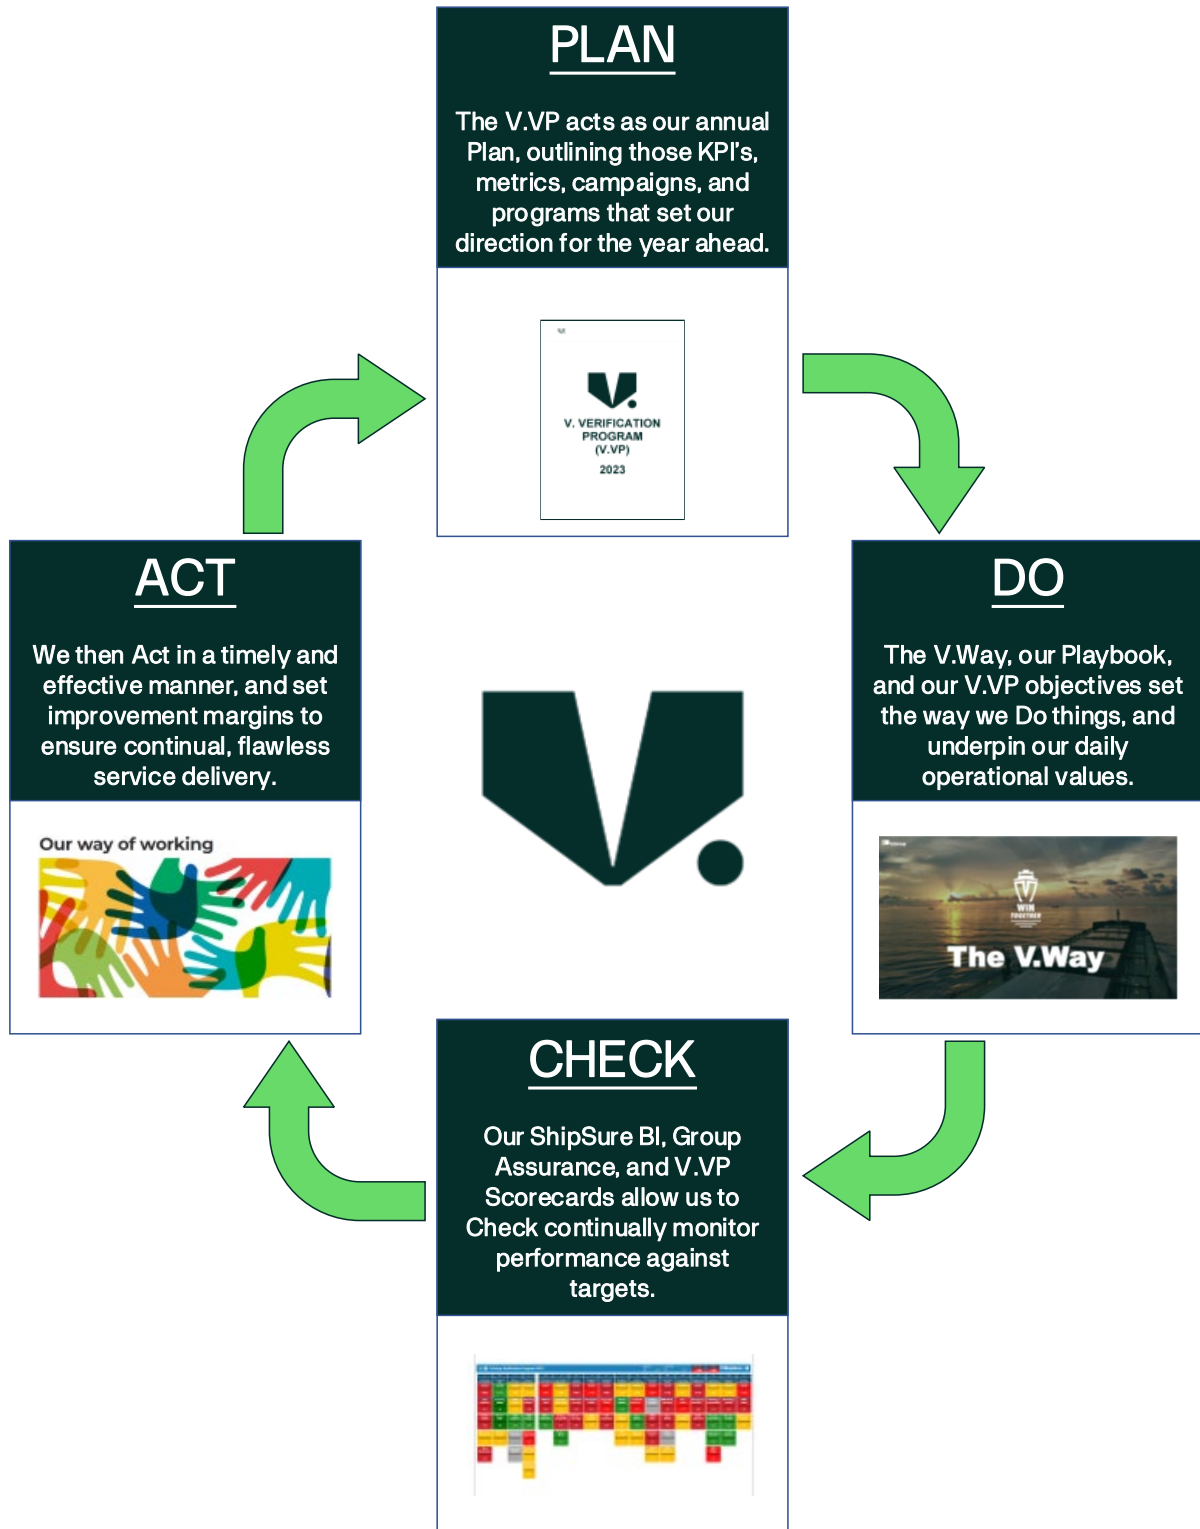

Where can I access the V.VP?

The V.VP is shared each year on our Yammer platform, and updates are subsequently published there, also. We also publish the V.VP on our intranet site. Finally, the document can also be accessed directly from the V.VP Scorecard on ShipSure BI, by clicking the ‘?’ icon in the top-right of the screen,

THE V.VP AND OUR 'PDCA' CYCLE

The V.VP forms an integral part of our internal 'Plan, Do, Check, Act' (PDCA) cycle, ensuring a continual evolution and improvement of our service offering to customers and stakeholders.

V.VP METRIC DEFINITION, MEASUREMENT and SCORING

Each V.VP element will be measured individually, providing monthly, 12-months' rolling and/or Year to Date (YTD) progress measurements of the vessels', Fleet Cells' (FC) and Business Units' (BU) overall progress against the V.VP.

Measurement and progress against V.VP elements shall be displayed via the Company's business intelligence (BI) platforms, which may be shared with external parties where requested.

Performance and progress review shall be conducted through;

- Live reviews conducted by BU and Fleet Cell staff as required
- Monthly Summary Reports, issued by Group HSSEQ
- Monthly BU Review meetings, hosted by the CEO, and BU Managing Directors
- Deep Dives hosted by Executive Team, and attended by BU Management Teams

Metric Structure and Definitions

Each metric is grouped into 4 strategic pillars, indicating our performance against our Risk, Environmental, Asset, and Customer management expectations. In addition, each metric is cross-referenced to relevant sections from our V.Group Playbook, V.MS, and relevant industry standards, in order that we can assess our performance against internal and external expectations.

Each V.VP metric is defined and documented as per the below example, using this standard template;

TITLE – <i>the topic of each metric</i>	STRATEGIC FOCUS	<i>Risk, Environmental, Asset, or Customer</i>
	ASSURANCE FOCUS	<i>Relevant Assurance program element</i>
DESCRIPTION	<i>Defining what the metric is looking at, and why this is important</i>	
KPI's	<i>Indicators we expect to see improving, as a result of meeting the requirements of the metric</i>	
MEASURES	<i>How the metric is specifically calculated and measured</i>	
TACTICAL TOOLS	<i>Those tools, processes, and behaviours used to influence and achieve success in the metric</i>	
BAND	<i>Banding and Scoring of the metric</i>	
REFERENCES	PLAYBOOK	<i>Relevant content and references from the V.Way and our associated Playbook</i>
	INDUSTRY	<i>Relevant content and references from industry standards and legislation</i>
ACTIONS	RESPONSIBLE	<i>The role that ensures the work is done to meet the requirements of the metric</i>
	ACCOUNTABLE	<i>The role that ensures above responsibilities are delivered</i>
	CONSULTED	<i>Those roles consulted in delivering against the metric and associated success</i>
	INFORMED	<i>Those roles informed of the inputs, workflows, and outcomes of the metric</i>

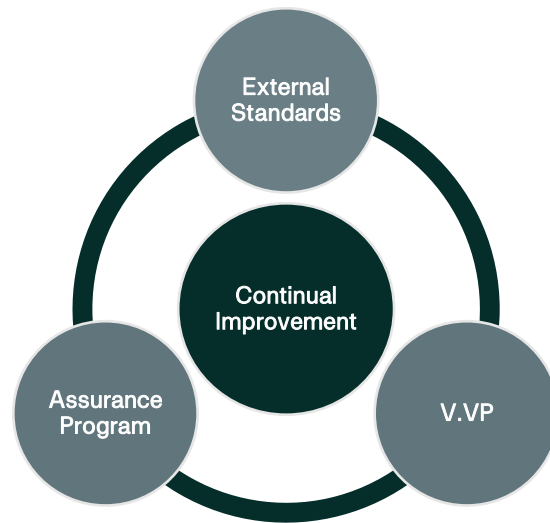

Linking the V.VP to our Assurance program

Each V.VP metric also highlights an 'Assurance Focus', linking the performance of each metric to a relevant element within our internal Assurance program.

Our internal Assurance program is, in-turn, directly linked to the most-relevant industry and client standards, against which our vessels and offices are audited, and our V.VP Scorecard is then structured to subsequently reflect each metrics' score and the overall Element score.

In directly linking our V.VP to our Assurance program, and our Assurance program to our external standards, we can ensure we maintain regular, data-driven insights on our management systems' compliance, outside of the scheduled Assurance visits, and as a proactive tool to promote positive performances and address improvement opportunities ahead of external assessment.

Element	Focus	Main Objective
1	Management, Leadership & Accountability	Provide direction, responsibilities, and accountabilities at all levels within the company.
1A	Developing and Maintaining a Safety Management System	Developing and maintaining an effective SMS requires commitment at the highest levels of the organisation and clear definitions of responsibilities involved in its administration.
2	Recruitment and Management of Shore-based Personnel	Ensure that the fleet is supported by sufficient, competent, and motivated shore-based personnel who are committed to the effective development and implementation of the SMS.
3	Recruitment and Management of Operational Personnel	Ensure that all vessels in the fleet have qualified, competent and motivated personnel who fully understand their roles, and who are capable of working effectively as a team.
3A	Wellbeing of Operational Personnel	Establish and maintain procedures for the recruitment, training, and wellbeing of vessel personnel.
4	Asset Reliability and Maintenance	Establish maintenance and repair procedures, so that all vessels in the fleet operate safely, efficiently, and reliably, and develop additional control measures for identified critical equipment.
4A	Asset Reliability and Maintenance (Critical Equipment)	To mitigate risks of causing harm, procedures are established to identify critical equipment and systems which, in the event of sudden failure, may result in a hazardous situation.
5	Navigational Safety	To ensure that vessels are navigated safely at all times.
6	Operational Activities	To establish planning and operational procedures to ensure that operations are conducted in a safe and efficient manner.
7	Management of Change	The company establishes a systematic process to evaluate, approve, communicate, and document both temporary and permanent changes that could impact their operations.
8	Incident Reporting, Investigation and Analysis	The company establishes procedures for effective reporting, investigation, and analysis to prevent recurrence.
9	Safety Management (Shore-Based Monitoring)	To develop a proactive safety culture both on board and ashore, that includes the implementation of preventive and mitigation measures to work towards incident free operation.
9A	Safety Management (Fleet Monitoring)	
10	Environmental and Energy Management	Companies establish a proactive approach to environmental and energy management that includes the identification of sources of emissions and implementation of measures to avoid or reduce potential impacts.
11	Emergency Preparedness and Contingency Planning	To establish an emergency response system and regularly test it to ensure an ongoing ability to effectively respond to and manage incidents.
12	Measurement, Analysis, and Improvement (Inspections)	To establish effective inspection and audit programmes that measure compliance with the SMS and monitor the condition of vessels. Analysis of the result drives continual improvement.
12A	Measurement, Analysis, and Improvement (Audits)	
13	Security	To provide a safe and secure working environment by developing a proactive approach to security management.

Scoring Bands

Each V.VP Element will be placed into a Scoring Band that reflects its importance and impact on our operational and cultural performance;

BAND 'A'	Those items that may result in <u>legislative issues</u> in event of non-performance. These metrics are listed here .	BINARY SCORING (0 or 4) or TIGHTLY DEFINED SLIDING SCALES resulting in score of 0 to 4
BAND 'B'	Those items that may result in <u>client or service delivery issues</u> in event of non-performance. These metrics are listed here .	SLIDING SCALES resulting in score of 0 to 4
BAND 'C'	Those items that indicate effectiveness of barriers and systems that prevent <u>internal performance</u> and/or non-compliance issues. These metrics are listed here .	SLIDING SCALES resulting in score of 0 to 4

Scoring Rationale

Each band is scored on a 0 to 4 scale, in order that our internal performance here can be directly correlated to external scoring through our most-frequently applied inspection and management assurance regimes, namely OCIMF's TMSA and other associated programs.

As our V.VP data and analysis grows over time, this will allow us to objectively benchmark our internal scoring against those received during external audit and present these in a manner this is familiar and relatable to our clients and industry stakeholders.

Communication of the V.VP

The V.VP is to be communicated to all vessels and shore-sites; following initial publication by the Group HSSEQ function, the Fleet management teams are to ensure circulation to all fleets, offices, and other shore sites locally.

Updates of the V.VP will be issued and published by Group HSSEQ in keeping with the above, and local staff will similarly be held responsible for ensuring onward distribution locally.

All schedules displayed throughout the V.VP are only indicative and may be adjusted by the accountable parties to suit operational/business needs.

V.VP 2023 METRICS

Annual Service Delivery KPI's

V.Group's annual Service Delivery KPIs are not scored or measured as part of the V.VP, and are presented via a separate, dedicated performance dashboard.

However, the annual Service Delivery KPIs are captured here to ensure that V.Group colleagues can find and refer to all operational business performance measures in a single document, against a single frame of reference.

SERVICE DELIVERY KPI'S		STRATEGIC FOCUS	All
		ASSURANCE FOCUS	Elements 1, 1A, 8, 9, 9A, 10, 11, 12, 12A, 13
DESCRIPTION	Performance in key Operations and HSSEQ areas, defined by industry and certifying bodies		
KPI's	<ul style="list-style-type: none"> Reduced incidents and unwanted events involving V.Group personnel and assets Reduced operational and commercial impacts to V.Group clients and assets Improved internal awareness and implementation of key processes and systems to influence performance Improved customer satisfaction through enhanced HSSEQ performance 		
MEASURES	As per dedicated table below		
TACTICAL TOOLS	<ul style="list-style-type: none"> Risk Management processes – JSA's, Risk Assessments, Permits to Work, Toolbox Talks etc. Compliance processes – Vessel and Office Audits, Senior Leader Engagement sessions, PSC preparations and reporting ShipSure platform – effective, accurate, and timely capture of data, reports, and actions within ShipSure ShipSure BI – effective and timely analysis of data and trends arising from HSSEQ data within ShipSure 		
REFERENCES	PLAYBOOK	<i>HSSEQ – We all act as HSSEQ Champions, taking responsibility for creating a strong performance culture ashore and onboard, and understanding that the threat of safety and environmental non-compliance are our biggest reputational risks.</i>	
	INDUSTRY	TMSA – 1, 1A, 8, 9, 9A, 10, 11, 12, 12A, 13 ISM – 9, 10, 12 MLC – 4,3,5	
ACTIONS	RESPONSIBLE	All Colleagues	
	ACCOUNTABLE	Managing Directors (MDs) (or equivalent business entity heads)	
	CONSULTED	Cluster HSSEQ, Group HSSEQ	
	INFORMED	Executive Team and Board	

Each individual Service Delivery KPI is listed below, with these targets and measurements being based upon reporting against a 12H/Day “Hours Worked” calculation.

For alternative 24H/Day “Hours Worked” reporting, functionality is be provided in the associated HSSEQ Scorecard to toggle between the 2 different reporting schemes, as required for analysis or external reporting.

	FOCUS	PERFORMANCE INDICATOR	DEFINITIONS / CALCULATIONS	2023 TARGET	2023 +/-
	Foundational	Hours Worked (HW)	For 12H/Day = (Crew x 12 Hours per Day) x Days in Month For 24H/Day = (Crew x 24 Hours per Day) x Days in Month	N/A	N/A
HEADLINE KPIs	HEALTH	Occupational Health Incident frequency (Hif)	$\frac{(\text{Total OHI cases} \times 1,000,000)}{\text{Total Hours Worked}}$	≤0.27	N/A – NEW for '23
	SAFETY	Total Recordable Injury Rate (TRIR)	$\frac{((\text{Fatalities} + \text{LTIs} + \text{RWCs} + \text{MTCs}) \times 1,000,000)}{\text{Total Hours Worked}}$	≤2.25	-0.26
	LEADERSHIP	Senior Leader Engagement frequency (SLEf)	$\frac{(\text{Number of SLE Calls} \times 200,000)}{\text{Total Hours Worked}}$	≥2.28	+0.23
	SECURITY	Security Incident frequency (Sif)	$\frac{(\text{Number of SIs} \times 1,000,000)}{\text{Total Hours Worked}}$	≤0.23	N/A – NEW for '23
	ENVIRONMENT	Environmental Incident frequency (ENVf)	$\frac{(\text{Total Env Incidents} \times 1,000,000)}{\text{Total Hours Worked}}$	ZERO	0
	QUALITY	RightShip Safety Score	Current Group Average RS Safety Score	≥3.91	0
	QUALITY	OM Vetting Risk Score	Current Group Average OM Vetting Risk Score	≤9.56	+0.56
	QUALITY	OM Vetting Deficiency Ratio	$\frac{\text{Total No. of OM Vetting Deficiencies Raised}}{\text{Total No. of OM Vetting Inspections}}$	≤2.50	+/- 0.00
	CUSTOMER	Technical Off-Hire	Total Technical Off-Hire (HH:MM:SS) / Total No. of Vessels	≤01:24:00	+00:40:00
	WELLFARE	On-Time Relief	% of Crew being Relieved On-Time, as Planned	≥95%	N/A – NEW for '23
	PSC	PSC Detentions Ratio	$(\text{Total Detentions} / \text{Total PSC Inspections}) \times 100$	≤1.25	-48%
LAGGING INDICATORS	SAFETY	Lost Time Injury Frequency (LTif)	$\frac{((\text{Fatalities} + \text{LTIs}) \times 1,000,000)}{\text{Total Hours Worked}}$	≤0.55	+0.15
	SAFETY	Restricted Workday Case frequency (RWCf)	$\frac{(\text{Restricted Work Cases} \times 1,000,000)}{\text{Total Hours Worked}}$	≤0.40	N/A – NEW for '23
	SECURITY	Ship Security Officer (SSO) Compliance	% of vessels with competent and certified SSOs appointed	100%	N/A – NEW for '23
	SECURITY	Completion of ISPS Drills	% of vessels completing ISPS drills	100%	N/A – NEW for '23
	ENVIRONMENT	RSQ21 Completion	% of Vessels with in-date Env. Audits	100%	N/A – NEW for '23
	ENVIRONMENT	RSQ21 Findings Rate	Rate of Findings Raised per RSQ21 Completed	≤3.20	N/A – NEW for '23
	QUALITY	RightShip DoC Score	Current Group Average RS DoC Score	≥4.00	+0.09
LEADING	HEALTH	PEME Completion	% of Seafarers completing Pre-Employment Medical Evaluations prior to joining	100%	N/A – NEW for '23
	HEALTH	Health-related Near Misses	$\frac{(\text{Number of NMs} \times 200,000)}{\text{Total Hours Worked}}$	≥4.15	N/A – NEW for '23
	SAFETY	Safety-related Near Misses	$\frac{(\text{Number of NMs} \times 200,000)}{\text{Total Hours Worked}}$	≥17.00	N/A – NEW for '23

INITIATIVES and PROGRAMS

Annual Safety Culture Survey

Following our 'snap-shot' survey in November and December '22, we will be conducting our first, full-scale Annual Safety Culture Survey in 2023.

The survey will be conducted by our partners, The OPC, on our behalf and will be open to all V. colleagues – ashore and afloat – to complete.

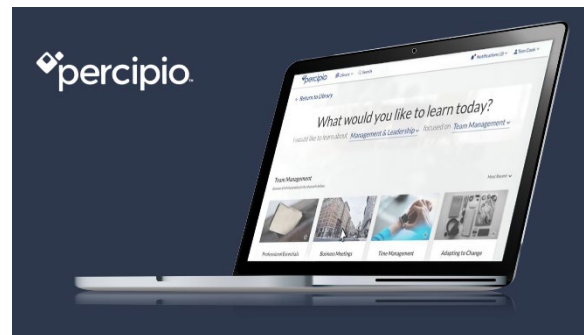

Please look out for the dedicated comms and updates in 2023, and we look forward to hearing your feedback and idea on how we can continue to grow our safety culture across V.

Percipio HSSEQ Training

Building on the success of the Percipio roll-out in 2022, we have committed to expanding the available library to include key HSSEQ learning materials, including those for our V.Rules program.

Percipio facilitates immersive and bite-size learning opportunities, allowing us to offer free learning opportunities via the software platform, and to link these learnings directly to our campaigns and programs across V.

Please look for the links and reminds to relevant Percipio content in future Bulletins, Safety Moments, and other key HSSEQ updates.

Safety Moments

This month's theme; **Safe Lifting Operations**

Lorem ipsum dolor sit amet, consectetur adipiscing elit, sed do eiusmod tempor incididunt ut labore et dolore magna aliqua.

- 1 Lorem ipsum dolor sit amet, consectetur adipiscing elit, sed do eiusmod tempor incididunt ut labore et dolore magna aliqua.
- 2 Lorem ipsum dolor sit amet, consectetur adipiscing elit, sed do eiusmod tempor incididunt ut labore et dolore magna aliqua.
- 3 Lorem ipsum dolor sit amet, consectetur adipiscing elit, sed do eiusmod tempor incididunt ut labore et dolore magna aliqua.
- 4 Lorem ipsum dolor sit amet, consectetur adipiscing elit, sed do eiusmod tempor incididunt ut labore et dolore magna aliqua.

Relevant V.Rules

Safe Mechanical Lifting

Plan lifting operations and control the area

- Confirm that the equipment and load have been inspected and are fit for purpose
- Only operate equipment that I am qualified to use
- Establish and obey barriers and exclusion zones
- I never walk under a suspended load

Additional training content is available to support this month's Safety Moment theme. Please Colleagues are encouraged to complete [V.Rules](#) and [V.Rules](#)

COLLEAGUES ARE REMINDED TO USE THIS MONTH'S THEME TO POPULATE LOCAL SAFETY MOMENTS FOR USE IN KEY MEETINGS ONSHORE AND WITH VESSELS

Safety Moments

2023 will see the introduction of scheduled 'Safety Moments' themes each month, covering topics relevant to operational considerations at that time of the year.

These Safety Moments will facilitate the presentation and awareness of key topics, in a uniform manner, across all of V., and provide links to relevant Percipio materials to offer further, interactive learning opportunities.

'Safety Catch of the Month'

V.'s 'Safety Catch of the Month' program has been a great success for several years, however 2023 will see us take it a new level!

Using our internal Yammer platform, we will share the excellent work done by Safety Catch nominees with all V. colleagues and allow them to vote on their preferred winners.

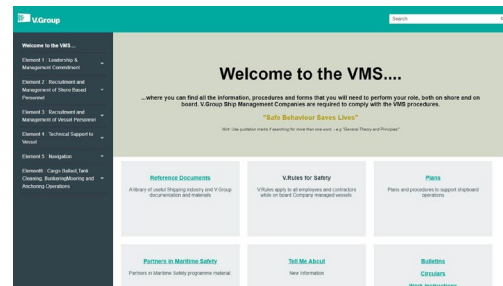

This will promote awareness and appreciation for the excellent Safety Catches coming, culminating in the recognition and reward of an overall annual Safety Champion winner.

V.MS Relaunch

In 2023, we will look to refresh and relaunch our safety management system, the V.MS, utilising a new digital hosting platform, with better functionality and improved user interface

The 'new look' V.MS will address a lot of the colleague feedback we have received in 2022 and deliver upon those items.

The content itself will also be restructured so that our key policies and processes are aligned to industry standards and easier to cross-reference when undertaking audits.

Together in Safety and MPIS

In-hand with the above V.MS relaunch, we will look to cross-reference with key industry programs such as 'Together in Safety' and Shell's 'Maritime Partners in Safety'.

V. are active members of these programs, and we look to make the valuable learnings and improvements available to us from such membership an integral part of how we continually improve our safety performance.

Safety Culture Committee

Finally, 2023 will see the launch of a Group-level Safety Culture Committee, starting in January.

Looking to provide updates on all the above programs, the Committee will be an open forum to encourage engagement and feedback from all V. colleagues via open-invite Teams meetings.

Invites will be shared on Yammer, and colleagues are encouraged to dial-in for the latest updates, and to bring their ideas to support continual improvement to the table. See the section below for further details.

Safety Culture Committee

The V.Group Safety Committee acts on behalf of, and is empowered by, V.Group’s Executive Team to promote employee engagement in and awareness of those programs and initiatives that will support the continual improvement of safety performance and culture within V.Group and the Group’s associated business activities.

The Committee’s membership is made up as follows;

CORE	Chair	Group Dir. HSSEQ	Nominated Executive Team sponsor and representative for the Committee
	Group Functional Representatives	HSSEQ	Heads of HSSEQ for Ship Management and Marine Services Business Units
		Technical	Representative/s from Technical functions
		Operations	Representative/s from Operations functions
		Crewing / HR	Representative/s from Crewing and HR functions
		Learning Development	Representative/s from Learning Development, covering Shore and Seafarer learning programs
		Communications	Representative/s from Corporate Communications functions
		Trainees	Representatives from trainee programs, including Seafarer Cadets and onshore Graduates
VOLUNTEERS	Employee Representatives	Shore	Volunteer members from onshore colleagues and from seafarer groups shall be selected to ensure a wide spread of representation across all business areas and activities.
		Seafarers	

The Committee shall interface with and consider inputs from various sources across V.Group, and provide actions, updates, and communications similarly, as per the following diagram;

The Committee meets via MS Teams ‘live event’ functionality, allowing all colleagues the opportunity to dial-in to any Committee meeting. These shall be communicated and hosted via the dedicated ‘Safety Culture’ channel on the MS Yammer internal social media platform; [LINK](#)

DRILLS, AUDITS, AND ASSURANCE

Group Assurance Program

The Group Assurance team conducts annual, internal audits in all relevant V.Group operational offices and sites, to ensure compliance with the V.MS, statutory requirements, and industry standards, across the entire Group.

The following schedule of assurance visits is planned in 2023;

Month	Business Unit and Location / Site
January	Monaco – ShipMan (Leisure)
February	
March	Aberdeen – ShipMan (Offshore)
April	Glasgow – ShipMan (Cargo) Piraeus – ShipMan (Cargo)
May	Limassol – ShipMan (Cargo) Manilla – CrewMan
June	Rio de Janeiro – ShipMan (Offshore)
July	Singapore – ShipMan (Cargo + Offshore) Riga – CrewMan
August	Nantes – ShipMan (Cargo) Hamburg – ShipMan (Cargo) Oslo – ShipMan (Cargo) Chennai – ShipMan (Cargo)
September	Copenhagen – ShipMan (Cargo) Dubai – ShipMan (Cargo + Offshore) Gdynia – CrewMan
October	Boston – ShipMan (Cargo) Rijeka – CrewMan Istanbul – CrewMan Burgas – CrewMan Constanta – CrewMan
November	Shanghai – ShipMan (Cargo)
December	

NOTE: The above schedule is subject to change, based on operational issues and identified HSSEQ needs as the year progresses.

Details on the V.Group Assurance program, reports, scores, planning, and benchmarks can be found on the dedicated SharePoint site accessible via [this link](#).

External ISO Audits

The following schedule of external ISO audits is planned in 2023;

Business Unit and Location / Site	Scheduled	Certifying Body
Oslo	March	LRQA
Dubai	March	LRQA
Hamburg	April	DNV
Nantes	May	LRQA
Glasgow	May	LRQA
Piraeus	July	LRQA
Shanghai	July	NSF and Xing Yuan Certification
Singapore	August	LRQA
Limassol	October	LRQA
Boston	November	LRQA
Brazil	December	LRQA
Chennai	December	LRQA

NOTE: The above schedule is subject to change, based on operational issues and identified HSSEQ needs as the year progresses.

External ISM Audits

The following schedule of external ISM audits is planned in 2023;

Business Unit and Location / Site	Scheduled	Certifying Body
Shanghai	February	LR
Oslo	March	LR
Chennai	March	LR
Nantes	March	Gibraltar Flag
Dubai	March	LR
Nantes	April	LR
Nantes	April	French Flag
Glasgow	May	LR
Glasgow	May	Belgium Flag
Glasgow	May	Gibraltar Flag
Glasgow	May	UK Flag
Brazil	May	LR
Hamburg	May	DNV
Copenhagen	May	LR
Copenhagen	May	BV
Singapore	May	LR
Piraeus	July	LR
Copenhagen	August	BV
Limassol	October	LR
Limassol	October	UK Flag
Nantes	October	French Flag
Boston	November	LR

NOTE: The above schedule is applicable only to Ship Management business units and is subject to change, based on operational issues and identified HSSEQ needs as the year progresses.

Shore Inspections, Meetings, and Drills

All Business Units shall conduct and record the following minimum scheduled activities:

Element...	Due	Responsible	Accountable	Consulted	Informed
Annual Master's Review of SMS	At least 1/Year, per Vessel	Masters	Cluster HSSEQ	Group HSSEQ	All Group (by Group HSSEQ)
Fire/Evacuation Drill	Annually	All Offices	Office Managers	Cluster HSSEQ	Group HSSEQ
1st Aid Drill	Annually	All Offices	Office Managers	Cluster HSSEQ	Group HSSEQ
Crisis Management Drill	Annually	All Offices	Office Managers	Cluster HSSEQ	Group HSSEQ
ISPS Drill	Annually	All Vessel-operating Offices	ODs	Cluster HSSEQ	Group HSSEQ
Firefighting Training	As Required (to renew certification)	All Offices	Office Managers	Cluster HSSEQ	Group HSSEQ
First Aid Training	As Required (to renew certification)	All Offices	Office Managers	Cluster HSSEQ	Group HSSEQ
HSE Committee Meetings	At least Quarterly	Cluster HSE Committee members	Cluster HSSEQ	Group HSSEQ	Group HSSEQ
Management Review Meeting	Clusters; At least Quarterly	Cluster MRM Committees	Cluster HSSEQ	Group HSSEQ	Respective Clusters and Group HSSEQ
	Group; Annually	Group Safety Culture Committee	Group HSSEQ	Cluster HSSEQ	All Group (by Group HSSEQ)

ANNEX A – GLOSSARY OF TERMS

≤	Less Than or Equal To
<	Less Than
≥	More Than or Equal To
>	More Than
BI	Business Intelligence
BU	Business Unit
Cat.	Category
CEO	Chief Executive Officer
Class	Classification Society
CMM	Crew Management Manual (V.MS Content)
CMP	Crew Management Partner
CO ₂	Carbon Dioxide
COP	Company Operations (V.MS Content)
DoC	Document of Compliance (with ISM Code)
DryBMS	Dry Bulk Management Standard
ENVf	Environmental Incident frequency (see Annex D for definition and calculation)
FAR	Fatal Accident Rate (see Annex D for definition and calculation)
FC	Fleet Cell
FFE	Fire-Fighting Equipment
Flag	Flag State/s
FO	Fleet Operations (V.MS Content)
H.	Hours
HazOcc	Hazardous Occurrence
Hif	Occupational Health Incident frequency
HoW/R	Hours of Work/Rest
HR	Human Resources
HSSEQ	Health, Safety, Security, Environmental and Quality
HW	Hours Worked (see Annex D for definition and calculation)
ISM	International Safety Management Code
ISO	International Standards Organisation
ISPS	International Ship and Port Facility Security Code
IT	Information Technology
JSA	Job Safety Analysis
KPI	Key Performance Indicator
L12M	Last 12 Months
LSA	Life-Saving Apparatus
LTif	Lost Time Injury frequency (LTif) (see Annex D for definition and calculation)
m ³	cubic meters
MarServ	Marine Services
MD	Managing Director
MLC	Maritime Labour Convention
MoC	Management of Change
MPIS	Maritime Partners in Safety
N/A	Not Applicable
NM	Near Miss
No.	Number
OBT	Onboard Training
OCIMF	Oil Companies International Marine Forum
OCM	Onboard Crew Management (V.MS Content)
OD	Operations Director
Ops	Operations
PDCA	Plan, Do, Check, Act
PEME	Pre-Employment Medical Examination
PMS	Planned Maintenance System
PO	Purchase Order
PSC	Port State Control
PSCI	Port State Control Inspection
RACI	Responsible, Accountable, Consulted, Informed
RCA	Root Cause Analysis
RCMP	Regional Crew Management Partner
RightShip	3 rd party maritime inspection and due diligence organisation
RWCf	Restricted Workday Case frequency (see Annex D for definition and calculation)
SDG	Sustainable Development Goals
ShipMan	Ship Management
Sif	Security Incident frequency (see Annex D for definition and calculation)
SIRE	Ship Inspection Report Programme
SLE	Senior Leader Engagement
SLEf	Senior Leader Engagement frequency
SMS	Safety Management System
Sof	Safety Observation frequency (see Annex D for definition and calculation)
SOLP	Senior Officer Leadership Program
SSO	Ship Security Officer
SWA	Stop Work Authority
t	tonnes
tCO _{2e}	tonnes (t) of Carbon Dioxide (CO ₂) equivalent (e)
TMISA	Tanker Management and Self-Assessment
TRIR	Total Recordable Injury Rate (see Annex D for definition and calculation)
U.N.	United Nations
V.MS	V. Management System
V.VP	V. Verification Program
VDR	Voyage Data Recorder
VIR	Vessel Inspection Report
WI	Work Instruction
YTD	Year to Date

ANNEX B – METRIC / STANDARDS CROSS-REFERENCE

METRIC	1 - Management, Leadership and Accountability	1A - Developing and Maintaining a Safety Management System	2 - Recruitment and Management of Shore-based Personnel	3 - Recruitment and Management of Operational Personnel	3A - Wellbeing of Operational Personnel	4 - Asset Reliability and Maintenance	4A - Asset Reliability and Maintenance (Critical Equipment)	5 - Navigational Safety	6 - Operational Activities	7 - Management of Change	8 - Incident Reporting, Investigation and Analysis	9 - Safety Management (Shore-Based Monitoring)	9A - Safety Management (Fleet Monitoring)	10 - Environmental and Energy Management	11 - Emergency Preparedness and Contingency Planning	12 - Measurement, Analysis, and Improvement (Inspections)	12A - Measurement, Analysis, and Improvement (Audits)	13 - Security

Operations-Specific Audits								C										
Outstanding PO's And Invoices									C									
Reporting Timeliness Of Unwanted Events										C								
Completion Of V.Rules Training												C						
SOLP Completion													C					
Internal Environmental Audit Findings' Rate														C				
Internal Inspection Submission Time Lag																C		
Internal Audit Submission Time Lag																		C

ANNEX D – SERVICE DELIVERY KPI DEFINITIONS & CALCULATIONS

HOURS WORKED	
Definition	Primary means of calculation for V. is based on a 12-hour day while serving onboard. However, where required for relevant external presentation/discussion, relevant dashboards will offer the functionality to display in a 24-hour day format also.
Calculation	No. of Seafarers onboard x 12 Hours x Days in Month , presented as HW
Relevance	Provides the basic benchmark against which HSE frequencies and ratios are calculated
OCCUPATIONAL HEALTH INCIDENT FREQUENCY	
Definition	All incidents where the primary outcome is a negative impact on health and/or wellbeing as result of work performed on behalf of V.
Calculation	Number of Occupational Health Incidents per 1 million Hours Worked, expressed as Hif
Relevance	Provides insight of working activities, practices, systems, substances, and/or environments that may present a risk to health and wellbeing and identify improvement opportunities to reduce future risk of repetition.
TOTAL RECORDABLE INJURY RATE	
Definition	Total Recordable Injuries includes work-related injuries and illnesses that result in: <ul style="list-style-type: none"> • <i>Death</i> • <i>Loss of consciousness</i> • <i>Days away from work</i> • <i>Restricted work activity or job transfer</i> • <i>Medical treatment (beyond first aid)</i> • <i>Significant work-related injuries or illnesses that are diagnosed by a physician or other licensed healthcare professional. These include any work-related case involving:</i> <ul style="list-style-type: none"> - <i>cancer and any other chronic irreversible disease</i> - <i>a fracture or cracked bone</i> - <i>a punctured eardrum</i>
Calculation	Frequency of Total Recordable Injury cases per 1 Million Hours Worked , presented as TRIR
Relevance	Provides a summary of all significant incidents having a direct impact on employee health & safety.
SENIOR LEADER ENGAGEMENT FREQUENCY	
Definition	Conduct of Senior Leader Engagement (SLE) calls with vessels in accordance with V.MS requirements, led by respective MD/CEO, OD, TD (for Leisure) & FM and subsequently recorded in ShipSure.
Calculation	Frequency of Senior Leader Engagement calls per 200,000 Hours Worked , expressed as SLEf
Relevance	Provides insight of working activities, practices, systems, substances, and/or environments that may present a risk to health and wellbeing and identify improvement opportunities to reduce future risk of repetition.
SECURITY INCIDENT FREQUENCY	
Definition	All incidents where the primary outcome is an impact on asset, site, personal, and/or data security with negative impact to V.
Calculation	Frequency of Security Incidents per 1 million Hours Worked , expressed as Sif
Relevance	Provides insight of security breaches that may present a risk to health and wellbeing and identify improvement opportunities to reduce future risk of repetition.
ENVIRONMENTAL INCIDENT FREQUENCY	
Definition	All incidents where the primary outcome is a negative environmental impact. This includes spills and releases of liquids, gases, wastes and any other pollutant.
Calculation	Frequency of Environmental Incidents per 1 Million Hours Worked , presented as ENVf
Relevance	Provides a clear insight of environmental impact, both regarding frequency and nature
RIGHTSHIP SAFETY SCORE	
Definition	RightShip Safety Score is assigned as per the RightShip vetting program and digital platform.
Calculation	Average of all vessel RightShip Safety Scores , as per the RightShip platform .
Relevance	Provides insight and benchmarking of independent, industry-/segment-wide operational and commercial performance, with a view to improving such over time.
OM VETTING RISK SCORE	
Definition	Assessment of risk levels assigned to findings and actions arising from Oil Major (OM) Vetting Inspections and reports
Calculation	Average Risk Rating of all OM Vetting Findings .
Relevance	Provides insight to the risk levels associated with operational- and compliance-related findings from vetting inspections, with a view to reducing overall risk over time.
OM VETTING DEFICIENCY RATIO	
Definition	The number of deficiencies arising from Oil Major (OM) Vetting Inspections and reports
Calculation	Average No. of Deficiencies across all OM Vetting Findings .
Relevance	Provides insight to the numbers and areas of deficiencies raised from vetting inspections, with a view to addressing repeat findings and driving continual improvement of standards, practices, and policies.
TECHNICAL OFF-HIRE	
Definition	The amount of time in HH:MM:SS that vessels are off-hire due to technical failures, defects, or breakdowns.
Calculation	Total Technical Off-Hire divided by Total No. of Vessels , expressed in HH:MM:SS
Relevance	Provides insight to the lengths and severity of off-hire events, and associated impacts, with a view to identifying causes and reducing repeat events through continual improvement of technical services.
ON-TIME RELIEF	
Definition	Seafarers being relieved on-time, in accordance with Seafarer Employment Agreements (SEAs).
Calculation	Percentage of all seafarers being relieved on-time
Relevance	Provides insight to the effectiveness of planning for on-time seafarer reliefs, with a view to minimising overdue crew and continually improving forward planning and mobilisation of seafarers for relief.
PSC DETENTIONS RATIO	
Definition	Vessel detentions arising from failures and/or non-compliance during Port State Control (PSC) inspections.
Calculation	Total No. of Detentions expressed as a Percentage of the Total No. of PSC Inspections Conducted
Relevance	Provides insight to PSC performance, with a view to avoiding detentions through continual improvement of the standards, practices, and policies dictating those operational areas and activities inspected during PSC inspections.

LOST TIME INJURY FREQUENCY	
Definition	Comprises all injuries including Fatalities but excluding Restricted Workday cases . <ul style="list-style-type: none"> • Lost Time Injury case is any work-related accidental injury other than a fatal injury which results in a person being unfit for work on the next day. • See below for Restricted Workday Case definition and KPI
Calculation	Frequency of LTI's per 1 Million Hours Worked , presented as LTI_f
Relevance	Provides a clear insight of serious incidents resulting in reduced workforce & operational efficiency, with potential for recurrence
RESTRICTED WORKDAY CASE FREQUENCY	
Definition	A Restricted Workday Case (RWC) is any work-related injury other than a fatality or lost workday case which results in a person being unfit for the full performance of a regular job on the shift/day after the injury. Work might be: <ul style="list-style-type: none"> ○ an assignment to a temporary job; ○ working in the regular job, but not performing all the usual duties of the job Where no meaningful Restricted Work is being performed, the incident should be recorded as an LTI; see above for LTI definition and KPI
Calculation	Frequency of RWCs per 1 Million Hours Worked , presented as RWC_f
Relevance	Provides a clear insight of serious incidents resulting in reduced workforce & operational efficiency, with potential for recurrence
SHIP SECURITY OFFICER (SSO) COMPLIANCE	
Definition	Ensuring that all vessels have a trained, competent, and certified SSO onboard at all times
Calculation	Total No. of Vessels with Compliant SSOs divided by Total No. of Vessels , expressed as % Compliant
Relevance	Provides insight of advance crew planning, to ensure competent personnel are onboard, ensuring compliance with ISPS requirements.
COMPLETION OF ISPS DRILLS	
Definition	Ensuring that all vessels complete security-focused drills and exercises, as required by the ISPS Code.
Calculation	Total No. of Vessels with Completed, As-Scheduled ISPS Drills divided by Total No. of Vessels , expressed as % Compliant
Relevance	Provides insight of effective planning & execution of ISPS training onboard, ensuring compliance with ISPS requirements.
RSO21 COMPLETION	
Definition	Ensuring that all vessels have completed and in-date RSO21 Environmental Audit, within last 12 months.
Calculation	Total No. of Vessels with Completed, In-Date RSO21 Environmental Audits divided by Total No. of Vessels , expressed as % Compliant
Relevance	Ensures vessels are receiving regular, detailed environmental audits, with relevant findings and actions to improve.
RSO21 FINDINGS RATE	
Definition	Ensuring that findings raised during RSO21 Environmental Audits are addressed and gradually reduced over time through continual improvement
Calculation	Total No. of Findings raised during RSO21 Environmental Audits divided by Total No. of RSO21 Environmental Audits , expressed as Frequency
Relevance	Demonstrates reductions in volumes of findings over time as continual improvement activities address causes of audit findings raised.
RIGHTSHIP DoC SCORE	
Definition	RightShip DoC Score is assigned as per the RightShip vetting program and digital platform.
Calculation	Average of all Ship Management Offices' individual office RightShip DoC Scores , as per the RightShip platform .
Relevance	Insight and benchmarking of independent, industry-/segment-wide operational and commercial performance, with a view to improving such over time.
PEME COMPLETION	
Definition	Measurement of completion of Pre-Employment Medical Examinations (PEME) for seafarers employed on V.-managed vessels.
Calculation	Total No. of Seafarers Completed PEME divided by Total No. of Seafarers Onboard , expressed as % Compliant
Relevance	Provides insight on effective completion of PEME as a means to identify pre-existing medical conditions prior to joining vessels, and to reduce risks and liabilities associated with medical conditions occurring/worsening onboard.
HEALTH-RELATED NEAR MISSES	
Definition	Insight of Near Miss (NM) reports arising from Health-related causes, which may have resulted in incidents, if not otherwise managed/avoided
Calculation	Frequency of Health-related NMs per 200,000 Hours Worked , presented as a Frequency
Relevance	Overview of pro-active safety culture and learning/improvement opportunities presented, without having a physical impact upon employees or assets.
SAFETY-RELATED NEAR MISSES	
Definition	Insight of Near Miss (NM) reports arising from Safety-related causes, which may have resulted in incidents, if not otherwise managed/avoided
Calculation	Frequency of Safety-related NMs per 200,000 Hours Worked , presented as a Frequency
Relevance	Overview of pro-active safety culture and learning/improvement opportunities presented, without having a physical impact upon employees or assets.
SAFETY-RELATED OBSERVATIONS	
Definition	Insight of Observation arising from Safety-related causes, which may have resulted in incidents, if not otherwise managed/avoided
Calculation	Frequency of Safety-related Observations per 200,000 Hours Worked , presented as a Frequency
Relevance	Overview of pro-active safety culture and learning/improvement opportunities presented, without having a physical impact upon employees or assets.
SECURITY-RELATED NEAR MISSES	
Definition	Insight of Near Miss (NM) reports arising from Security-related causes, which may have resulted in incidents, if not otherwise managed/avoided
Calculation	Frequency of Security-related NMs per 200,000 Hours Worked , presented as a Frequency
Relevance	Overview of pro-active safety culture and learning/improvement opportunities presented, without having a physical impact upon employees or assets.
SECURITY-RELATED OBSERVATIONS	
Definition	Insight of Observation arising from Security-related causes, which may have resulted in incidents, if not otherwise managed/avoided
Calculation	Frequency of Security-related Observations per 200,000 Hours Worked , presented as a Frequency
Relevance	Overview of pro-active safety culture and learning/improvement opportunities presented, without having a physical impact upon employees or assets.
ENVIRONMENTAL-RELATED NEAR MISSES	
Definition	Insight of Near Miss (NM) reports arising from Environmental-related causes, which may have resulted in incidents, if not otherwise managed/avoided
Calculation	Frequency of Environmental -related NMs per 200,000 Hours Worked , presented as a Frequency
Relevance	Overview of pro-active safety culture and learning/improvement opportunities presented, without having a physical impact upon employees or assets.

ENVIRONMENTAL-RELATED OBSERVATIONS	
Definition	Insight of Observation arising from Environmental -related causes, which may have resulted in incidents, if not otherwise managed/avoided
Calculation	Frequency of Environmental -related Observations per 200,000 Hours Worked , presented as a Frequency
Relevance	Overview of pro-active safety culture and learning/improvement opportunities presented, without having a physical impact upon employees or assets.
